INTERNSHIPS

Bioinformatics R&D Intern

06/2026 – 08/2026

WebGraphique

Sfax, Tunisia

- Developed a Python-based bioinformatics platform for genomic variant interpretation and functional genomics analysis.
- Integrated genomic resources including Ensembl, ClinVar, gnomAD and PubMed to support automated variant annotation and interpretation.
- Explored machine-learning approaches for genomic data analysis using biological datasets, including TCGA breast cancer data.
- Designed backend services and data-processing workflows for integrating variant, genomic and protein-level information.

Software Engineering Research Intern

06/2025 – 08/2025

Georgia State University

Remote

- Collaborated in a team under Professor Saeed Motevali to design system architecture and gather requirements for a real estate platform.
- Evaluated third-party API providers including Zillow alternatives, Bridge Interactive, and RentCast.

Full Stack Developer Intern

06/2024 – 08/2024

Dracodes

Tunis, Tunisia

- Developed full-stack features using React and PostgreSQL in collaborative team environment
- Implemented frontend components with React and optimized database queries using PostgreSQL

Mobile Developer Intern

06/2023 – 08/2023

WebGraphique

Sfax, Tunisia

- Developed mobile application using Flutter with focus on code quality and user experience
- Worked both independently and within team environment with high attention to detail

EDUCATION

Bachelor of Science in Software Engineering

06/2027

South Mediterranean University (SMU)

High School Diploma

07/2022

Al Jahili, Al Ain

Al Ain

Awards & Honors: IT Marathon 12th Edition Extracurricular Activities: Future Problem Solving Program International

SKILLS

Technical

Languages: Python, JavaScript, TypeScript, C, Dart, Java
Web: React, Node.js, Express

Professional

Team Collaboration, Leadership, Problem Solving, Attention to Detail, Research, Tutoring & Student Assistance

LANGUAGES

Arabic

Native

English

Bilingual

French

Conversational

AWARDS

IT Marathon 12th Edition <i>United Arab Emirates University</i>	2022
International Biology Olympiad <i>IBO</i>	2020
Future Problem Solving Program International <i>FPSPI</i>	2019

VOLUNTEERING

Volunteer <i>UAE Al Ain Municipality</i> Participated in community clean-up and enrichment projects	01/2016 – 01/2021 Al Ain
Volunteer <i>FIFA Club World Cup Event</i> - Supported event operations for the FIFA Club World Cup, assisting in on-field coordination of club logo ceremonies. - Guided attendees to seating and ensured a smooth and organized event experience.	2021 AL Ain

PROJECTS

Farming Game Croptails <i>Godot Engine, GDScript</i> - Developing a 2D farming simulation game in Godot using GDScript and a test-scene-first prototyping methodology. - Implemented core mechanics including player state machines, tool states, Y-sorting rendering, dynamic tilemaps, and NPC navigation agents. - Built full systems for inventory management, crop cultivation, day/night cycles, data serialization saving, dialogue UI, and audio integration.	05/2026 – Present
ML Emotion Detection Developing machine learning model for emotion detection and classification using Python	2026 – 2026
React 3D Art Gallery Developed interactive 3D gallery application with immersive VR experience using React and advanced 3D rendering	2025 – 2025

EXPERIENCE

IEEE Computer Society Club <i>Vice President</i> Led team initiatives and coordinated technical events and workshops for student community	2024 – 2024 South Mediterranean University (SMU)
Private Tutor Provided personalized tutoring and student assistance in various academic subjects
